

# Fear of Blue MON-Day Got You Down?

## *Fear Not !*

Alleviate your “Blue MON-Day” concerns by implementing state of the art emissions estimation methodologies from Greenfield Environmental, Inc!

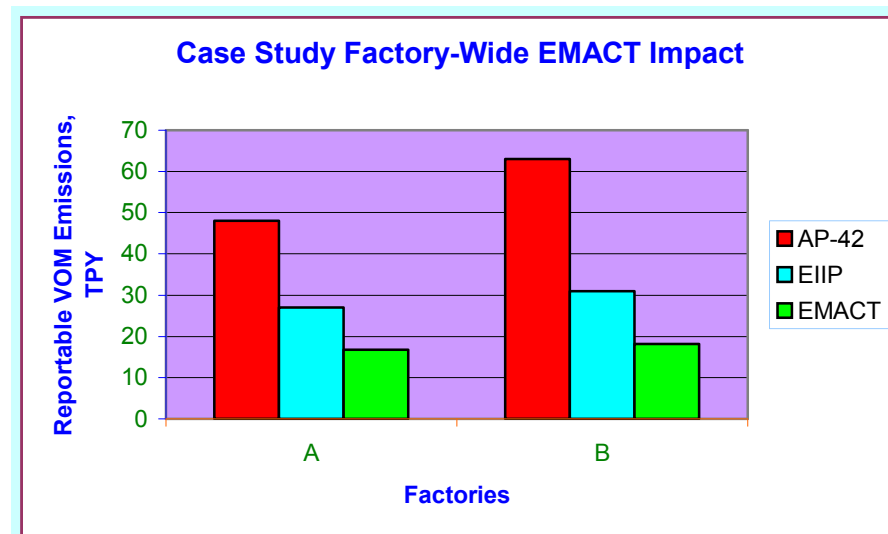

- Make Greenfield’s EMACT Environmental Management and Compliance Tool a part of your MON strategy today and:
  - Maximize your ability to remain a quality high throughput manufacturer not subject to MON regulations!
  - Reduce your potential to purchase expensive, requisite control technology as legislated by MON!
  - Bring your emissions estimates in line with reality!

Greenfield’s Factory-Wide and Per-Batch emission factor algorithms yield the most accurate results available!

- Greenfield’s headspace saturation and full-factory estimation models provide emissions totals **per chemical, per process, per equipment type, per period!**
  - Methods reviewed with USEPA

Will Greenfield eliminate your “Black Box” worries? Sure!

- Greenfield has full technical reports and summaries of our experimental designs, results, trends, and implications of findings available to all interested customers
- Greenfield Models available for presentation review

Results representative of existing Greenfield customers. Results will vary based on user recipes and equipment configurations. EMACT will never exceed EIIP results.

**CALL US NOW FOR AN EMACT DEMONSTRATION!**
